EDUCATION

University of Waterloo

Computer Science, 3.92 Major GPA

- Admansi Entrance Scholarship for \$5,000
- President's Scholarship of Distinction

Waterloo, ON
Expected April 2027

WORK EXPERIENCE

Figma

Software Engineering Intern

San Francisco, CA
May 2026 – Present

WindBorne Systems Inc.

Software Engineering Intern

Palo Alto, CA
May 2025 – Aug 2025

- Owned full-stack development of an AI-powered forecasting insights platform (**TypeScript, React, Rails**) used by energy and commodities traders; contributed to **\$2.5M+ ARR** within 4 months of launch
- Engineered a tropical cyclone tracking pipeline by designing storm detection algorithms in **C++/Python** over **500TB+** of global gridded weather data; built a caching layer in **Rust** enabling low-latency retrieval
- Integrated **LangGraph**-based, tool-using **LLM agents** to generate automated meteorological + commodity event insights; shipped a conversational UI with forecast-aware actions and internal tooling

CIBC

Software Engineering Intern — Full-Stack / ML Platform

Toronto, ON
Jan 2025 – Apr 2025

- Built real-time chatbot features using **Python, Redis, and WebSocket** streaming, enabling low-latency tool execution and interactive user experiences for CIBC's internal AI assistant
- Delivered LLM-powered capabilities including live news ingestion, **RAG** over patent databases, and sentiment classification for document triage and automated summarization
- Architected a full-stack LLM prototyping framework (**Next.js, Prisma, FastAPI**) adopted across **10+ internal repositories**, standardizing deployment and evaluation workflows

Treasury Board Secretariat of Canada

Software Developer Intern

Toronto, ON
May 2024 – Aug 2024

- Built accessible, high-performance frontend features for a government performance-tracking platform serving **500,000+ active users**, meeting **AODA** compliance requirements
- Expanded CI test coverage by **150+** automated BDD tests (**C# SpecFlow, Selenium**) and migrated the testing stack to Katalon to improve maintainability and execution reliability

PROJECTS

Marble Investments | *Next.js, React, MongoDB*

Jan. 2024

- Created a web application for a mutual fund that has handled over \$125k in total and streamlined transactions through Stripe API, secured user data using elliptic curve cryptography

Tenacity Labs

Unfollowed.lol | *TypeScript, Supabase, Django, Postgres, GraphQL*

Apr. 2024

- Built a chrome extension using JavaScript, Django, and Supabase to track marketing analytics and launched on Product Hunt with a #8 daily placement and 100+ votes with 4000+ daily active users

Retrospect | *Swift, Go, Google Cloud*

Jul. 2024

- Developed an app for creating and sharing digital time capsules using Swift, Go, and Google Cloud buckets for storage, implemented a social graph to improve user retention

SKILLS

Languages: C++, Python, JavaScript, TypeScript, Ruby, Java, C#, Scala, Go, SQL

Frameworks: React, Rails, MongoDB, Next.js, Spring Boot, MySQL, Postgres, Supabase, Redis, AWS, Azure

Programming Concepts: REST, Object-Oriented Programming, Data Structures, Algorithms, Networking, Microservices, Concurrency, Systems Design, DevOps, CI/CD, Software Development Life Cycle
